Oke Dudu

Software Tester

About me

At Polaris, we're on a mission to create a safer and fairer world. We provide software solutions that empower police forces and local authorities to enforce and track traffic and parking offences, manage permits and licenses, and control high-risk assets like firearms and tasers. Since securing support from August Equity in May 2023, we've been on an exciting growth trajectory. We've expanded our reach both in the UK and internationally, acquired key companies like Farthest Gate and JML Software Solutions, and invested heavily in our operations.

Projects

Ecommerce

This is an exciting time to join Polaris. We're seeking ambitious, forward-thinking individuals who are eager to make a real impact and grow their

careers in a rapidly evolving industry. If you're ready to be part of a team that's shaping the future of public safety and compliance technology, we want to hear from you. We are seeking a highly skilled Quality Assurance (QA) Engineer to ensure the delivery of robust and reliable technical solutions for local government projects. The ideal candidate will have expertise in manual and automated testing, experience with Jira, and a strong technical background in web-based applications, SQL, user stories, and Gherkin syntax. Knowledge of payment systems, reporting solutions, and security testing is highly desirable. This role will involve working in an Agile environment to design and execute comprehensive testing strategies.
