

Maryan Ahmed, Project Manager

London, 07909981436, MaryanAhmed900@hotmail.com

SUMMARY

Dynamic Agile Project Manager with over four years of experience in leading end-to-end project delivery and enhancing Agile practices. Proficient in using Scrum and Kanban methodologies to facilitate multi-team collaboration and boost team velocity. Achievements include improving delivery speed and efficiency through effective backlog management and capacity planning. Eager to leverage skills in a Junior Project Manager role to drive successful outcomes and deliver value to any forward-thinking organisation.

WORK EXPERIENCE

06/2024 – Present	Agile Project Manager / Scrum Master, Blue Sky	London
	• Spearhead end-to-end Agile project delivery, ensuring coherence with business goals. • Enhance Agile practices and fortify Scrum ceremonies. • Collaborate with Product Owners to refine scope and backlog quality. • Facilitate multi-team delivery using Scrum and Kanban methodologies. • Manage RAID logs, dependencies, and escalations efficiently. • Support engineering teams with capacity planning and forecasting. • Boost team velocity by eliminating delivery blockers. • Provide structured reporting and delivery insights to stakeholders. • Drive delivery success using OKRs and KPIs.	
06/2020 – 09/2024	Project Manager, Increase Limited	London
	• Executed marketing and digital media projects employing Waterfall methodology. • Oversaw complete lifecycle delivery from requirements gathering to final release. • Coordinated editorial, design, production, and technical teams seamlessly. • Administered schedules, plans, and resource allocation meticulously. • Championed structured RAID and issue escalation processes. • Enhanced governance through the development of workflows and documentation standards.	
04/2022 – Present	Founder, Voice of Horn	London
	• Charted strategic direction for a digital media brand. • Supervised content production, operations, and partnerships. • Led content strategy while ensuring high creative quality. • Managed both internal and freelance teams effectively. • Expanded digital presence and audience engagement significantly. • Formulated monetization strategies to enhance revenue. • Leveraged analytics to inform content improvements. • Forged industry partnerships and embraced emerging trends.

	Somali (Somali)	

PROJECTS

01/2025 – Present	JOBRATOR – AI-Driven Recruitment Platform	Remote, UK
	JOBRATOR is an AI-powered recruitment platform designed to automate CV creation, enable intelligent job matching, deliver AI-based assessments, and support employers with shortlisting, interviewing, and performance evaluation. As Agile Project Manager/Scrum Master, I led the development team and facilitated all Agile ceremonies, including daily stand-ups, sprint planning, reviews, and retrospectives. I monitored key Agile metrics such as burndown and burn-up charts and team velocity to support data-driven planning and capacity management. I worked closely with the Product Owner and stakeholders to provide progress updates, manage risks, and ensure alignment with business goals. I removed impediments, maintained project documentation, coached Agile	
07/2024 – 01/2025	Mentorship Platform Web Development , Role: Agile Project Manager / Scrum Master	Remote, UK
	As Agile Project Manager for the Mentorship Platform Web Development Project, I led end-to-end delivery of a user-centric platform connecting mentors and mentees using Agile Scrum methodologies. I facilitated all Agile ceremonies, managed sprint planning, release schedules, and resource allocation, and tracked performance through burndown charts, velocity reports, dashboards, and roadmap reviews. I worked closely with the Product Owner to refine user stories, remove impediments, and ensure delivery alignment. I coordinated cross-functional teams across development, design, and QA, overseeing quality assurance through regression testing, UAT, and API validation. I maintained project	

documentation, managed risks and RAID logs, supported budget and stakeholder reporting, coordinated beta test

06/2025 – 11/2025

Tech Suite – Software Product Development Platform

Remote, UK

- As Agile Project Manager for Tech Suite, a scalable web and mobile software platform, I led end-to-end delivery to streamline workflows and enhance user experience. I coordinated cross-functional teams and facilitated all Agile ceremonies, working closely with the Product Owner and stakeholders to maintain clear priorities and alignment with the product vision. I managed full project documentation, including roadmaps, requirements, technical artefacts, UAT scripts, test plans, RAID logs, release notes, and lessons learned. I tracked delivery through sprint metrics, burndown charts, velocity, milestones, and budget reporting using Jira, Confluence, Azure DevOps, Miro, and Power BI. I oversaw QA activities including regression testing, API validation, and UAT sign-off, removed impediments
